Notes on our publication program 2016/2017

The journal Aesthetics in Dermatology and Surgery complements and will extend the Karger dermatology program beginning in 2017. The journal Annals of Neurosciences has been added to our neurology program. The scope of the Karger open access, online-only journal range will be further broadened in 2017 by the addition of the three journals Case Reports on Headache, Digital Biomarkers and GE Portuguese Journal of Gastroenterology.

The open access journals Audiology and Neurotology Extra, Case Reports in Orthopedics, Clinical Bioinformatics, Medical Epigenetics, and Ophthalmologica Extra have ceased publication.

The book series Contributions to Human Development, Else Kröner-Fresenius Symposia, Genome Dynamics, and Yearbook of Pediatric Endocrinology will be discontinued.

For further information please refer to the comprehensive entries on our home page www.karger.com.
With articles offering an excellent balance between clinical cytology and cytopathology, Acta Cytologica fosters the understanding of the pathogenetic mechanisms behind cytomorphology and thus facilitates the translation of frontline research into clinical practice. As the official journal of the International Academy of Cytology and affiliated to over 50 national cytology societies around the world, Acta Cytologica evaluates new and existing diagnostic applications of scientific advances as well as their clinical correlations. Original papers, review articles, meta-analyses, novel insights from clinical practice, and letters to the editor cover topics from diagnostic cytopathology, gynecologic and non-gynecologic cytopathology to fine needle aspiration, molecular techniques and their diagnostic applications. As the perfect reference for practical use, Acta Cytologica addresses a multidisciplinary audience practicing clinical cytopathology, cell biology, oncology, interventional radiology, otorhinolaryngology, gastroenterology, urology, pulmonology and preventive medicine.

Acta Cytologica
Founded: 1957
Category: Clinical Research
Field of Interest: Cytology

Listed in bibliographic services, including:
PubMed/MEDLINE, Web of Science,
Google Scholar, Scopus, Embase

2017: Volume 61
6 issues per volume
Language: English
ISSN 0001–5547
e-ISSN 1938–2650

The essential resource for today’s cytopathologist

Editor-in-Chief
Kari Syrjänen, Turku

Co-Editor
Volker Schneider, Freiburg, i.B.

‘Acta Cytologica is the only truly international journal of clinical cytology and cytopathology. Following the traditions of almost 60 years, Acta Cytologica continues to serve its global readership by publishing high-quality original research, review articles and meta-analyses.’
Kari Syrjänen, Editor-in-Chief

Acta Haematologica is a well-established and internationally recognized clinically-oriented journal featuring balanced, wide-ranging coverage of current hematology research. A wealth of information on such problems as anemia, leukemia, lymphoma, multiple myeloma, hereditary disorders, blood coagulation, growth factors, hematopoiesis and differentiation is contained in first-rate basic and clinical papers some of which are accompanied by editorial comments by eminent experts. These are supplemented by short state-of-the-art communications, reviews and correspondence as well as occasional special issues devoted to 'hot topics' in hematology. These will keep the practicing hematologist well informed of the new developments in the field.

The American Journal of Nephrology is a peer-reviewed journal that focuses on timely topics in both basic science and clinical research. Papers are divided into several sections, including:

- Original reports, spanning clinical, basic and outcomes research
- In-depth topic reviews on specific topics selected by the Editor and Associate Editors
- Invited debates – selected on 'hot topics' determined by the editorial board

Responding to the ever increasing pace in research, the American Journal of Nephrology adheres to a very tight publication schedule: accepted papers appear online within 5–6 weeks of acceptance.

Annals of Neurosciences is a multidisciplinary peer-reviewed journal that provides an international platform for discussing recent advances in the neurosciences. As the official journal of the Indian Academy of Neurosciences, Annals of Neurosciences publishes wide-ranging original research results, reviews and opinions aimed at increasing our understanding of the neurosciences and encouraging the development of better diagnostic tools and effective treatments for neurological disorders. The journal brings together information on computational and experimental studies, translational research, and clinical care. Also welcomed are papers that take an evidence-based approach to arguing against accepted principles and practices.

Led by an editorial team of international experts, Annals of Neurosciences is a portal for established and young researchers alike to the very latest interdisciplinary research results and perspectives in the field.

Annals of Nutrition and Metabolism is a leading international peer-reviewed journal for sharing information on human nutrition, metabolism and related fields, covering the broad and multidisciplinary nature of science in nutrition and metabolism. The journal focuses on human nutrition and metabolism and related areas, including experimental studies and basic science that can inform human nutrition science. We welcome manuscripts describing observational and intervention studies as well as basic science reports on the topics of foods, diets and dietary supplements, nutrigenomics and genetics related to metabolism, on energy metabolism, macro- and micronutrients including vitamins and minerals, biofunctional compounds, dietetics, obesity, clinical nutrition, social sciences and health economy as related to nutrition and metabolism and nutrition policy. Laboratory-based science may include descriptions of relevant experimental models. In addition to Original Papers, the journal will publish Review Articles on topical subjects, Systematic Reviews, short Commentaries and Viewpoint articles that may address current controversies, short Meeting Reports, Letters to the Editor, and Announcements/Society News. The journal will also publish Supplements with proceedings from internationally relevant conferences on nutrition and metabolism.

Audiology and Neurotology provides a forum for the publication of the most-advanced and rigorous scientific research related to the basic science and clinical aspects of the auditory and vestibular system and diseases of the ear. This journal seeks submission of cutting edge research opening up new and innovative fields of study that may improve our understanding and treatment of patients with disorders of the auditory and vestibular systems, their central connections and their perception in the central nervous system. In addition to original papers the journal also offers invited review articles on current topics written by leading experts in the field. The journal is of primary importance for all scientists and practitioners interested in audiology, otology and neurotology, auditory neurosciences and related disciplines.

Audiology and Neurotology

*We are pleased to bring to our international readership the latest basic science findings, which are the underpinnings for the translational research that leads to advances in the diagnosis and treatment of ear and balance disorders.*

Practical information on hemodialysis, hemofiltration, peritoneal dialysis and apheresis is featured in this journal. Recognizing the critical importance of equipment and procedures, particular emphasis has been placed on reports, drawn from a wide range of fields, describing technical advances and improvements in methodology. Papers reflect the search for cost-effective solutions which increase not only patient survival but also patient comfort and disease improvement through prevention or correction of undesirable effects. Advances in vascular access and blood anticoagulation, problems associated with exposure of blood to foreign surfaces and acute-care nephrology, including continuous therapies, also receive attention. Nephrologists, internists, intensivists and hospital staff involved in dialysis, apheresis and immunoadsorption for acute and chronic solid organ failure will find this journal useful and informative.

Blood Purification also serves as a platform for multidisciplinary experiences involving nephrologists, cardiologists and critical care physicians in order to expand the level of interaction between different disciplines and specialties.

Brain, Behavior and Evolution is a journal with a loyal following, high standards, and a unique profile as the main outlet for the continuing scientific discourse on nervous system evolution. The journal publishes comparative neurobiological studies that focus on nervous system structure, function, or development in vertebrates as well as invertebrates. Approaches range from the molecular over the anatomical and physiological to the behavioral. Despite this diversity, most papers published in Brain, Behavior and Evolution include an evolutionary angle, at least in the discussion, and focus on neural mechanisms or phenomena. Some purely behavioral research may be within the journal’s scope, but the suitability of such manuscripts will be assessed on a case-by-case basis. The journal also publishes review articles that provide critical overviews of current topics in evolutionary neurobiology.

Cardiology features first reports on original clinical, preclinical and fundamental research as well as ‘Novel Insights from Clinical Experience’ and topical comprehensive reviews in selected areas of cardiovascular disease. ‘Editorial Comments’ provide a critical but positive evaluation of a recent article. Papers not only describe but offer critical appraisals of new developments in non-invasive and invasive diagnostic methods and in pharmacologic, nutritional and mechanical/surgical therapies. Readers are thus kept informed of current strategies in the prevention, recognition and treatment of heart disease. Special sections in a variety of subspecialty areas reinforce the journal’s value as a complete record of recent progress in cardiology or subspecialty areas. ‘Editorial Comments’ provide a critical but positive evaluation of a recent article. ‘Novel Insights from Clinical Experience’ and topical comprehensive reviews in selected areas of cardiovascular disease.

The journal CardioRenal Medicine explores the mechanisms by which obesity and other metabolic abnormalities promote the pathogenesis and progression of heart and kidney disease (cardiorenal metabolic syndrome). It provides an interdisciplinary platform for the advancement of research and clinical practice, focusing on translational issues. Attention is paid to the fact that some metabolic abnormalities cluster with heart and chronic kidney disease, and collectively this is called the cardiorenal metabolic syndrome. Moreover, certain metabolic abnormalities of the heart promote impaired coronary artery endothelial function, diastolic dysfunction and ischemic reconditioning that parallel glomerular hyperfiltration and impairments in proximal tubule handling of sodium and albumin. Another point of focus is the role of the obesity epidemic in promoting the increasing incidence of heart and kidney disease in industrialized countries and the prevailing problems of insufficient exercise and excessive consumption of cheap, unwholesome food in promotion of the cardiorenal metabolic syndrome in both adults and children.

CardioRenal Medicine addresses a multidisciplinary audience consisting of nephrologists, cardiologists, nutritionists, endocrinologists, physiologists and general internists.

Caries Research publishes epidemiological, clinical and laboratory studies in dental caries, erosion and related dental diseases. Some studies build on the considerable advances already made in caries prevention, e.g. through fluoride application. Some aim to improve understanding of the increasingly important problem of dental erosion and the associated tooth wear process. Others monitor the changing pattern of caries in different populations, explore improved methods of diagnosis or evaluate methods of prevention or treatment. The broad coverage of current research has given the journal an international reputation as an indispensable source for both basic scientists and clinicians engaged in understanding, investigating and preventing dental disease.

Cells Tissues Organs aims at bridging the gap between cell biology and developmental biology and the emerging fields of regenerative medicine (stem cell biology, tissue engineering, artificial organs, in vitro systems and transplantation biology). CTO offers a rapid and fair peer-review and exquisite reproduction quality. Special topic issues, entire issues of the journal devoted to a single research topic within the range of interests of the journal, are published at irregular intervals.

A rapidly-growing field, stroke and cerebrovascular research is unique in that it involves a variety of specialties such as neurology, internal medicine, surgery, radiology, epidemiology, cardiology, hematology, psychology and rehabilitation. Cerebrovascular Diseases is an international forum which meets the growing need for sophisticated, up-to-date scientific information on clinical data, diagnostic testing, and therapeutic issues, dealing with all aspects of stroke and cerebrovascular diseases. It contains original contributions, reviews of selected topics and clinical investigative studies, recent meeting reports and work-in-progress as well as discussions on controversial issues. All aspects related to clinical advances are considered, while purely experimental work appears if directly relevant to clinical issues.

The open access journal Cerebrovascular Diseases Extra provides additional contents based on reviewed and accepted submissions to the main journal Cerebrovascular Diseases on www.karger.com/cee.

An international forum on all aspects of antimicrobial and antitumor chemotherapy

Chemotherapy
International Journal of Experimental and Clinical Chemotherapy

Editor-in-Chief
G. Minotti, Rome

Associate Editors
G. Delogu, Rome
G. Graziani, Rome

This journal publishes original research articles and state-of-the-art reviews on all aspects of antimicrobial and antitumor chemotherapy. The results of experimental and clinical investigations into the microbiological and pharmacologic properties of antibacterial, antiviral and antitumor compounds are major topics of publication. Papers selected for the journal offer data concerning the efficacy, toxicity, and interactions of new drugs in single or combined applications. Studies designed to determine the pharmacokinetic and pharmacodynamic properties of similar preparations and comparing their efficacy are also included: Special emphasis is given to the development of drug-resistance, an increasing problem worldwide.

During the last decades, Cytogenetic and Genome Research has been the leading forum for original reports and reviews in human and animal cytogenetics, including molecular, clinical and comparative cytogenetics. In recent years, most of its papers have centered on genome research, including gene cloning and sequencing, gene mapping, gene regulation and expression, cancer genetics, comparative genetics, gene linkage and related areas. The journal also publishes key papers on chromosome aberrations in somatic, meiotic and malignant cells. Its scope has expanded to include studies on invertebrate and plant cytogenetics and genomics. Also featured are recent international reports on human and animal chromosome nomenclature and reports on gene mapping in domestic animals. In addition to regular issues, the journal has been publishing since 2002 a series of topical issues on a broad variety of themes from cytogenetic and genome research.

As a unique forum devoted exclusively to the study of cognitive dysfunction, *Dementia and Geriatric Cognitive Disorders* concentrates on Alzheimer’s and Parkinson’s disease, Huntington’s chorea and other neurodegenerative diseases. The journal draws from diverse related research disciplines such as psychogeriatrics, neuropsychology, clinical neurology, morphology, physiology, genetic molecular biology, pathology, biochemistry, immunology, pharmacology and pharmaceutics. Strong emphasis is placed on the publication of research findings from animal studies which are complemented by clinical and therapeutic experience to give an overall appreciation of the field.

The open access journal *Dementia and Geriatric Cognitive Disorders Extra* provides additional contents based on reviewed and accepted submissions to the main journal *Dementia and Geriatric Cognitive Disorders* on [www.karger.com/dee](http://www.karger.com/dee).

Published since 1893, *Dermatology* provides a worldwide survey of clinical and investigative dermatology. Original papers report clinical and laboratory findings. In order to inform readers of the implications of recent research, reviews prepared by invited, internationally recognized scientists are regularly featured. In addition, the journal publishes papers on novel treatments, surgical pearls, consensus guidelines and industry news.

*Dermatology* offers the analytical dermatologist a broad range of information, from practical problem solving to a deeper mechanistic understanding of skin diseases, while at the same time providing space for further hypotheses that may help to find new solutions to old problems. The journal publishes contributions from across the globe on a wide range of skin-related topics including epidemiology, skin biology, clinical dermatology, and therapy. It enjoys a high reputation in the field of dermatology.

Developmental Neuroscience is a multidisciplinary journal publishing papers covering all stages of invertebrate, vertebrate and human brain development. Emphasis is placed on publishing fundamental as well as translational studies that contribute to our understanding of mechanisms of normal development as well as genetic and environmental causes of abnormal brain development. The journal thus provides valuable information for both physicians and biologists. To meet the rapidly expanding information needs of its readers, the journal combines original papers that report on progress and advances in developmental neuroscience with concise mini-reviews that provide a timely overview of key topics, new insights and ongoing controversies.

Gain new insights into the mechanisms of normal and abnormal brain development

Digestion concentrates on clinical research reports: in addition to editorials and reviews, the journal features sections on Stomach/Esophagus, Bowel, Neuro-Gastroenterology, Liver/Bile, Pancreas, Metabolism/Nutrition and Gastrointestinal Oncology. Papers cover physiology in humans, metabolic studies and clinical work on the etiology, diagnosis, and therapy of human diseases. It is thus especially cut out for gastroenterologists employed in hospitals and outpatient units. Moreover, the journal’s coverage of studies on the metabolism and effects of therapeutic drugs carries considerable value for clinicians and investigators beyond the immediate field of gastroenterology.

Digestive Diseases publishes original reports and review articles that describe the most recent advances in diagnostic methods and treatment options for diseases of the gastrointestinal tract and the hepatopancreato-biliary system. The journal also covers related topics such as microbiota, nutrition and probiotics, endoscopy and imaging. Providing information about the latest clinical evidence and their application in patient care, Digestive Diseases is an invaluable source of information for clinicians, specialists and physicians-in-training.

Digestive Surgery presents a comprehensive overview in the field of gastrointestinal surgery. Interdisciplinary in scope, the journal keeps the specialist aware of advances in all fields that contribute to improvements in the diagnosis and treatment of gastrointestinal disease. Particular emphasis is given to articles that evaluate not only recent clinical developments, especially clinical trials and technical innovations such as new endoscopic and laparoscopic procedures, but also relevant translational research. Each contribution is carefully aligned with the need of the digestive surgeon. Thus, the journal is an important component of the continuing medical education of surgeons who want their practice to benefit from a familiarity with new knowledge in all its dimensions.

European Addiction Research is a unique international scientific journal for the rapid publication of innovative research covering all aspects of addiction and related disorders. Representing an interdisciplinary forum for the exchange of recent data and expert opinion, it reflects the importance of a comprehensive approach to resolve the problems of substance abuse and addiction in Europe. Coverage ranges from clinical and research advances in the fields of psychiatry, biology, pharmacology and epidemiology to social, and legal implications of policy decisions. The goal is to facilitate open discussion among those interested in the scientific and clinical aspects of prevention, diagnosis and therapy as well as dealing with legal issues. An excellent range of original papers makes European Addiction Research the forum of choice for all.

European Neurology publishes original papers, reviews and letters to the editor. Papers presented in this journal cover clinical aspects of diseases of the nervous system and muscles, as well as their neuropathological, biochemical, and electrophysiological basis. New diagnostic probes, pharmacological and surgical treatments are evaluated from clinical evidence and basic investigative studies. The journal also features original works and reviews on the history of neurology.

European Surgical Research

Clinical and Experimental Surgery

Editor-in-Chief
B. Vollmar, Rostock

The continuing aim of European Surgical Research is to further a vivid exchange of information between the fields of surgical research and applied clinical surgery.' Brigitte Vollmar, Editor-in-Chief

European Surgical Research features original clinical and experimental papers, condensed reviews of new knowledge relevant to surgical research, and short technical notes serving the information needs of investigators in various fields of operative medicine. Coverage includes surgery, surgical pathophysiology, drug usage, and new surgical techniques. Special consideration is given to information on the use of animal models, physiological and biological methods as well as biophysical measuring and recording systems. The journal is of particular value for workers interested in pathophysiologic concepts, new techniques and in how these can be introduced into clinical work or applied when critical decisions are made concerning the use of new procedures or drugs.

The European Thyroid Journal publishes papers reporting original research in basic, translational and clinical thyroidology. Original contributions cover all aspects of the field, from molecular and cellular biology to immunology and biochemistry, from physiology to pathology, and from pediatric to adult thyroid diseases with a special focus on thyroid cancer. Readers also benefit from reviews by noted experts, which highlight especially active areas of current research. The journal will further publish formal guidelines in the field, produced and endorsed by the European Thyroid Association.

The first journal to focus on the fetus as a patient, *Fetal Diagnosis and Therapy* provides a wide range of biomedical specialists with a single source of reports encompassing the common discipline of fetal medicine. The journal includes peer-reviewed original research papers, spanning from basic and pathophysiologic investigations to clinical studies in fetal diagnosis and therapy. In addition, the journal addresses timely topics of wide interest in a section dedicated to Reviews and Mini Reviews, where specific clinical questions are covered by internationally renowned experts. Finally, two sections, Novel Insights in Fetal Medicine and Images in Fetal Medicine, are dedicated to particularly interesting case reports with a special focus on cases documented by means of multimodal imaging.

Published since 1947, *Folia Phoniatrica et Logopaedica* provides a forum for international research on the anatomy, physiology, and pathology of structures of the speech, language, and hearing mechanisms. Original papers published in this journal report new findings on basic function, assessment, management, and test development in communication sciences and disorders, as well as experiments designed to test specific theories of speech, language, and hearing function. Review papers of high quality are also welcomed.

*Folia Phoniatrica et Logopaedica* has rigorous review standards while maintaining its reputation as one of the few scientific journals that presents a global perspective on communication sciences and disorders. A reader is likely to find work relevant to clinical-scientific concerns in Asia, North America, the Middle East, and Africa. The combination of scholarly rigor plus a global view of communication sciences and disorders makes *Folia Phoniatrica et Logopaedica* truly unique in the field.

Recognizing that research in human biology must be founded on a comparative knowledge of our closest relatives, this journal is the natural scientist’s ideal means of access to the best of current primate research. *Folia Primatologica* covers fields as diverse as molecular biology and social behaviour, and features articles on ecology, conservation, palaeontology, systematics and functional anatomy. In-depth articles and invited reviews are contributed by the world’s leading primatologists. In addition, special issues provide rapid peer-reviewed publication of conference proceedings. *Folia Primatologica* is one of the top-rated primatology publications and is acknowledged worldwide as a core journal for primatologists, zoologists and anthropologists.

A journal for food scientists, engineers and technologists

FOOD SCIENCE AND TECHNOLOGY RESEARCH

Executive Editors
Food Technology and Engineering
S. Adachi, Kyoto
Food Science and Chemistry
T. Matsui, Kyushu

Published by the
Japanese Society for Food Science and Technology

Food Science and Technology Research, published by the Japanese Society for Food Science and Technology, features reviews as well as original and technical articles on basic and applied food research. The main objective of this periodical is the dissemination of information relating to current research results, novel theories and technologies, and professional activities across geographical as well as academic boundaries. Coverage ranges from chemistry, biotechnology, nutrition, physical and physicochemical properties, processing, cooking, unit operations, analysis, measurements and control, safety and health to marketing and environmental aspects related to food. The journal welcomes contributions from scientists, engineers and technologists throughout the world. Membership of the society is not required for the submission of papers.

International journal for basic research, clinical trials and practice in complementary medicine

Forschende Komplementärmedizin/Research in Complementary Medicine is an international journal that aims to bridge the gap between traditional and complementary/alternative medicine (CAM) on a sound scientific basis, promoting their mutual integration. Accordingly, experts of both traditional and CAM medicine cooperate on the journal’s editorial board, which accepts papers only after a rigorous peer-review process in order to maintain a high standard of scientific quality.

Gastrointestinal Tumors is an international, peer-reviewed journal that brings together the leading opinions in all fields related to gastrointestinal cancer research. Ranging from the identification of new therapeutic targets to epidemiology, disease prevention, treatment and patient management, the journal provides a platform for the dissemination of key opinions and research from thought leaders in the field. By publishing timely reviews and original papers covering the latest developments, the journal will help readers gain insight into the evolving body of research across the relevant disciplines.

Gerontology
International Journal of Experimental, Clinical, Behavioural, Regenerative and Technological Gerontology

**Editor-in-Chief**
G. Wick, Innsbruck

“The unique scientific value proposition of Gerontology that distinguishes it from all other gerontological journals is its policy to publish first class work from various fields, rather than focussing on only one area of research’
Prof. G. Wick, Innsbruck (Editor-in-Chief)

In view of the ever-increasing fraction of elderly people, understanding the mechanisms of aging and age-related diseases has become a matter of urgent necessity. Gerontology, the oldest journal in the field, is also the only journal that responds to this need by drawing topical contributions from multiple disciplines to support the fundamental goals of extending active life and enhancing its quality. The range of papers is classified into four sections. In the Clinical Section, the aetiology, pathogenesis, prevention and treatment of age-related diseases are discussed from a gerontological rather than a geriatric viewpoint. The Experimental Section contains up-to-date contributions from basic gerontological research. Papers dealing with behavioural development and related topics are placed in the Behavioural Science Section. Basic aspects of regeneration in different experimental biological systems as well as in the context of medical applications are dealt with in a special section that also contains information on technological advances for the elderly. Providing a primary source of high-quality papers covering all aspects of aging in humans and animals, Gerontology serves as an ideal information tool for all readers interested in the topic of aging from a broad perspective.

This journal covers the most active and promising areas of current research in gynecology and obstetrics. Invited, well-referenced reviews by noted experts keep readers in touch with the general framework and direction of international study. Original papers report selected experimental and clinical investigations in all fields related to gynecology, obstetrics and reproduction. Short communications are published to allow immediate discussion of new data. The international and interdisciplinary character of this periodical provides an avenue to less accessible sources and to worldwide research for investigators and practitioners.

The mission of *Hormone Research in Paediatrics* is to improve the care of children with endocrine disorders by promoting basic and clinical knowledge. The journal facilitates the dissemination of information through original papers, mini reviews, clinical guidelines and papers on novel insights from clinical practice. Periodic editorials from outstanding paediatric endocrinologists address the main published novelties by critically reviewing the major strengths and weaknesses of the studies.

Distinguished by its international recognition since 1958, Human Development publishes in-depth conceptual articles, commentaries, and essay book reviews that advance our understanding of developmental phenomena. Contributions serve to raise theoretical issues, flesh out interesting and potentially powerful ideas, and differentiate key constructs. Contributions come primarily from developmental psychology. Contributions are also welcomed from varied disciplines, including anthropology, biology, education, history, philosophy, psychology, and sociology.

*Offers new insights into human development throughout the life span*
Gathering original research reports and short communications from all over the world, Human Heredity is devoted to methodological and applied research on the genetics of human populations, association and linkage analysis, genetic mechanisms of disease, and new methods for statistical genetics, for example, analysis of rare variants and results from next generation sequencing. The value of this information to many branches of medicine is shown by the number of citations the journal receives in fields ranging from immunology and hematology to epidemiology and public health planning, and the fact that at least 50% of all Human Heredity papers are still cited more than 8 years after publication (according to ISI Journal Citation Reports). Special issues on methodological topics (such as ‘Consanguinity and Genomics’ in 2014; ‘Integration of Omics Data in Genetic Epidemiology’ in 2015 or reviews of advances in particular fields (‘Genetic Diversity in European Populations: Evolutionary Evidence and Medical Implications’ in 2014; ‘Genes and the Environment in Obesity’ in 2013) are published every year. Renowned experts in the field are invited to contribute to these special issues.

Imparting the most current information to physicians caring for patients with intestinal diseases, this journal seeks to identify the basic pathophysiological mechanisms common to different inflammatory intestinal diseases, to compare the environmental conditions involved in their pathogenesis, and to provide important insights into their therapies. *Inflammatory Intestinal Diseases* thus reduces the gap between clinical and basic sciences as well as between hepatology and inflammatory diseases of the intestinal tract such as inflammatory bowel diseases, celiac disease and irritable bowel syndrome. *Inflammatory Intestinal Diseases* also aims to improve the exchange of knowledge between researchers from Eastern and Western countries, which is reflected in the composition of the Editorial Board. The journal accepts randomized controlled clinical trials, observational studies, and cost-effectiveness analyses as well as commentary type and systematic reviews and consensus statements.

International Archives of Allergy and Immunology provides a forum for basic and clinical research in modern molecular and cellular allergology and immunology. Appearing monthly, the journal publishes original work in the fields of allergy, immunopathology, immunogenetics, immunopharmacology, immunoendocrinology, tumor immunology, mucosal immunity, transplantation and immunology of infectious and connective tissue diseases. In addition to original papers it features short communications, reviews, minireviews, commentaries and opinions. A team of internationally renowned and committed editors guarantees a fair review process, high scientific quality and fast dissemination of significant and novel work.

Interventional Neurology aims primarily at reporting clinical and laboratory studies on endovascular techniques as well as other interventional therapies in the management of stroke. Further emphasis is placed on interventional studies for cerebrovascular diseases, intracranial tumors and diseases of the spinal cord. Contributions related to interventions in neurological disorders of other specialities, i.e. angiology, neurology, neuroradiology or neurosurgery, are also welcome.

The Editors of Intervirology invite the submission of manuscripts on a wide range of topics in fundamental and medical virology. The journal’s scope encompasses work on the molecular biology of human and animal viruses, including genome organization and regulation, and the structure and function of viral proteins. The pathogenesis, immunology, diagnosis, epidemiology, prophylaxis and therapy of viral diseases are also considered. The journal regularly publishes thematic issues often including timely review articles and field research reports on controversial topics. It aims to be easily accessible to both specialists in the field and to those who want to keep track of the latest developments outside their own area of interest.

The *Journal of Innate Immunity* is a bimonthly journal covering all aspects within the area of innate immunity, including evolution of the immune system, molecular biology of cells involved in innate immunity, pattern recognition and signals of ‘danger’, microbial corruption, host response and inflammation, mucosal immunity, complement and coagulation, sepsis and septic shock, molecular genomics, and development of immunotherapies. The journal publishes original research articles, short communications, reviews, commentaries and letters to the editors. In addition to regular papers, some issues feature a special section with a thematic focus.

*The innate immune system is subject to a dynamic and growing scientific exploration. The scope of Journal of Innate Immunity is to compile and disseminate frontline research. The journal covers the fields from invertebrate to mammalian innate immunity, humoral to cellular immune responses, as well as local versus systemic inflammation.*

We are entering a new and exciting era of microbiological study and application. Recent advances in the now established disciplines of genomics, proteomics and bioinformatics, together with extensive cooperation between academic and industrial concerns have brought about an integration of basic and applied microbiology as never before. The Journal of Molecular Microbiology and Biotechnology (JMMB) aims to reflect this development by publishing original research papers from all areas of microbiology and biotechnology. It also features written symposia on selected topics, timely reviews and minireviews. Theoretical approaches and descriptions of novel, microbiologically relevant software is also considered. Contributions and ideas from large segments of the scientific community are welcome to make JMMB a viable, much-needed and up-and-coming forum for current basic and applied microbiological research.

The emerging field of nutrigenetics and nutrigenomics is rapidly gaining importance, and this new international journal has been established to meet the needs of the investigators for a high-quality platform for their research. Endorsed by the recently founded ‘International Society of Nutrigenetics/Nutrigenomics’ (ISNN), the Journal of Nutrigenetics and Nutrigenomics welcomes contributions not only investigating the role of genetic variation in response to diet and that of nutrients in the regulation of gene expression, but is also open for articles covering all aspects of gene-environment interactions in the determination of health and disease. Original papers and reviews cover the genetic basis for the variable responses to diet and lifestyle factors in chronic conditions (e.g. cardiovascular disease, obesity, diabetes, cancer), methods to assess gene-environment interactions and other related relevant topics, with research drawing from both human and animal studies.

The Journal of Nutrigenetics and Nutrigenomics has become a unique platform for the discussion and sharing of of knowledge about the interrelationship between genetics and nutrition. It is thus the leading source for information on the challenges, opportunities and progress in personalized nutrition.’

Jing X. Kang, Editor

Nutrients and gene expression, genetic variation and dietary response

The Journal of Vascular Research publishes original articles and reviews of scientific excellence in vascular and microvascular biology, physiology and pathophysiology. The scope of the journal covers a broad spectrum of vascular and lymphatic research, including vascular structure, vascular function, haemodynamics, mechanics, cell signalling, intercellular communication, growth and differentiation. JVR’s ‘Vascular update’ series regularly presents state of the art reviews on hot topics in vascular biology. Manuscript processing times are, consistent with stringent review, kept as short as possible due to electronic submission. All articles are published online first, ensuring rapid publication. The Journal of Vascular Research is the official journal of the European Society of Microcirculation. A biennial prize is awarded to the authors of the best paper published in the journal over the previous two years, thus encouraging young scientists working in the exciting field of vascular biology to publish their findings.

Kidney Diseases aims to provide a platform for Asian and Western research to further and support communication and exchange of knowledge. Articles cover the most recent clinical and basic science relevant to the entire field of nephrological disorders, including glomerular diseases, acute and chronic kidney injury, tubulo-interstitial disease, hypertension and metabolism-related disorders, end-stage renal disease, and genetic kidney disease. Special articles are prepared by two authors, one from East and one from West, which compare genetics, epidemiology, diagnosis methods, and treatment options of a disease.

Liver cancer has a very high prevalence among cancers in general and is one of the most common causes of death worldwide. Based on these facts, the journal *Liver Cancer* serves the growing need to better understand the causes, mechanisms and therapy of the malignancy. It provides the international community of researchers and clinicians with a platform for their research results, focusing on molecular carcinogenesis, prevention, surveillance, diagnosis and treatment, including molecular targeted therapy, of the disease. *Liver Cancer* publishes clinical and translational research related to the field of liver cancer in both humans and experimental models in the form of original and review articles.

Molecular Neuropsychiatry

Molecular Neuropsychiatry is a peer reviewed, rapid communication journal that focuses on molecular neuropharmacology, synaptic neurobiology, expression studies, neural circuits, imaging, neural stem cells, genetics, systems neurobiology and human, animal, and cellular model systems. The journal publishes original research articles, reviews that shed light on the molecular basis of psychiatric illnesses and normal brain behavior as well as short communications including new insights and new developments. The submitted paper will be subject to an editorial review and a decision whether to further peer review will be made in approximately five business days. We aim to have a review decision within one month. Molecular Neuropsychiatry is the official journal of the Molecular Psychiatry Association, whose purpose it is to promote research findings that may lead to a better understanding of the molecular basis of psychiatric disorders.

Molecular Syndromology publishes high-quality research articles, short reports and reviews on common and rare genetic syndromes, aiming to increase clinical understanding through molecular insights. Topics of particular interest are the molecular basis of genetic syndromes, genotype-phenotype correlation, natural history, strategies in disease management and novel therapeutic approaches based on molecular findings. Research on model systems is also welcome, especially when it is obviously relevant to human genetics. With high-quality reviews on current topics the journal aims to facilitate translation of research findings to a clinical setting while also stimulating further research on clinically relevant questions. The journal targets not only medical geneticists and basic biomedical researchers, but also clinicians dealing with genetic syndromes. With four Associate Editors from three continents and a broad international Editorial Board the journal welcomes submissions covering the latest research from around the world.

This highly respected and frequently cited journal is a prime source of information in the area of fetal and neonatal research. Original papers present research on all aspects of neonatology, fetal medicine and developmental biology. These papers encompass both basic science and clinical research including randomised trials, observational studies and epidemiology. Basic science research covers molecular biology, molecular genetics, physiology, biochemistry and pharmacology in fetal In addition to the classic features the journal accepts papers for the sections Research Briefings and Sources of Neonatal Medicine (historical pieces). Papers reporting results of animal studies should be based upon hypotheses that relate to developmental processes or disorders in the human fetus or neonate.

Nephron comprises three sections, which are each under the editorship of internationally recognized leaders and served by specialized and young Associate Editors. Apart from high-quality original research, Nephron publishes invited reviews/minireviews on up-to-date topics. Papers undergo an innovative and transparent peer review process encompassing a Presentation Report which assesses and summarizes the presentation of the paper in an unbiased and standardized way. New sections of the Journal are Second Opinion and Case Studies in Genetics. Second Opinion provides a platform for international experts and opinion leaders to cast a critical over published papers dealing with hot topics in clinical and experimental nephrology. The objective of Case Studies in Genetics is to provide clinically relevant examples of the genetic heterogeneity of renal diseases. The open access journal Nephron Extra provides additional contents based on reviewed and accepted submissions to the main journal Nephron on www.karger.com/nef.

KF17070_PL
Neurodegenerative Diseases is a bimonthly, multidisciplinary journal for the publication of advances in the understanding of neurodegenerative diseases, including Alzheimer’s disease, Parkinson’s disease, amyotrophic lateral sclerosis, Huntington’s disease and related neurological and psychiatric disorders.

Neurodegenerative Diseases accepts high-quality papers in the form of either short reports (less than 5 pages) or articles (6–12 pages) from a broad spectrum of scientific research areas ranging from molecular and cell biology to neuroscience, pharmacology, genetics and clinical sciences.

Neuroendocrinology publishes papers reporting original research in basic and clinical neuroendocrinology. The journal explores the complex interactions between neuronal networks and endocrine glands (in some instances also immune cells) in both central and peripheral nervous systems. Original contributions cover all aspects of the field, from molecular and cellular neuroendocrinology, physiology, pharmacology, and the neuroanatomy of neuroendocrine systems to neuroendocrine correlates of behaviour, clinical neuroendocrinology and neuroendocrine cancers. Readers will also benefit from reviews by noted experts, which highlight especially active areas of current research, and special focus editions of topical interest.

Neuroendocrinology is listed in bibliographic services, including: PubMed/MEDLINE, Web of Science, Google Scholar, Scopus, Embase. 2017: Volumes 104, 105 4 issues per volume Language: English ISSN 0028–3835 e-ISSN 1423–0194

Neuroepidemiology is the only internationally recognised peer-reviewed periodical devoted to descriptive, analytical and experimental studies in the epidemiology of neurologic disease. The scope of the journal expands the boundaries of traditional clinical neurology by providing new insights regarding the etiology, determinants, distribution, management and prevention of diseases of the nervous system. In order to meet the demands of the ever increasing pace in research, Neuroepidemiology is committed to reduce its online publication span to approx. six weeks after acceptance: papers will be published online first, and their printed version will be included in the next scheduled issue. The journal enjoys a high scientific reputation with a continually increasing impact factor and an equally high circulation.

The rapidly expanding area of research known as neuroimmunomodulation explores the way in which the nervous system interacts with the immune system via neural, hormonal, and paracrine actions. Encompassing both basic and clinical research, Neuroimmunomodulation reports on all aspects of these interactions. Basic investigations consider all neural and humoral networks from molecular genetics through cell regulation to integrative systems of the body. The journal also aims to clarify the basic mechanisms involved in the pathogenesis of the CNS pathology in AIDS patients and in various neurodegenerative diseases. Although primarily devoted to research articles, timely reviews are published on a regular basis.

The newly established journal Neuroimmunomodulation aims to promote the integration of basic and clinical research on the nervous system. It is the official organ of the International Society for Neuroimmunomodulation (ISNIM). The journal covers a broad spectrum of neurologic disorders, including some which are related to neuroendocrine and immunologic mechanisms.

Subscriptions "Neuroimmunomodulation" provide regular updates on the latest developments in the rapidly expanding field of research. The journal encompasses all aspects of these interactions, including basic investigations of nerve and humoral networks, molecular genetics, cell regulation, and integrative systems of the body. It also focuses on clarifying the basic mechanisms involved in CNS pathology in AIDS patients and various neurodegenerative diseases.

Neuroimmunomodulation

Neuropsychobiology

International Journal of Experimental and Clinical Research in Biological Psychiatry, Pharmacopsychiatry, Biological Psychology/Pharmacopsychology and Pharmacoelectroencephalography

Editor-in-Chief
W. Strik, Bern

The biological approach to mental disorders continues to yield innovative findings of clinical importance, particularly if methodologies are combined. This journal collects high quality empirical studies from various experimental and clinical approaches in the fields of Biological Psychiatry, Biological Psychology and Neuropsychobiology. It features original, clinical and basic research in the fields of neurophysiology and functional imaging, neuropharmacology and neurochemistry, neuroendocrinology and neuroimmunology, genetics and their relationships with normal psychology and psychopathology. In addition, the reader will find studies on animal models of mental disorders and therapeutic interventions, and pharmacoelectroencephalographic studies. Regular reviews report new methodologic approaches, and selected case reports provide hints for future research. Neuropsychobiology is a complete record of strategies and methodologies employed to study the biological basis of mental functions including their interactions with psychological and social factors.

Ocular Oncology and Pathology provides a selection of topical clinical and basic research articles covering the etiology, pathology, diagnostic techniques, imaging features, and advances in medical and surgical treatment of ophthalmic cancers. The focus lies on clinicopathologic correlations, evidence-based clinical studies and translational science. In addition to original papers, Ocular Oncology and Pathology features timely reviews, controversial topics, and summaries of related articles to ensure that its readers remain well informed.

Ocular Oncology and Pathology is the official journal of the American Association of Ophthalmic Oncologists and Pathologists (aaoop). This is a unique journal that is dedicated to the specialty of ocular oncology and pathology, which encompasses the medical, surgical and radiation care of patients with ocular cancers as well as the pathology of these cancers. The journal publishes original clinical and translational research articles that pertain to ocular oncology and pathology, as well as small case series and brief reports.

More information at www.karger.com/oop
Although laboratory and clinical cancer research need to be closely linked, observations at the basic level often remain removed from medical applications. This journal works to accelerate the translation of experimental results into the clinic, and back again into the laboratory for further investigation. The fundamental purpose of this effort is to advance clinically-relevant knowledge of cancer, and improve the outcome of prevention, diagnosis and treatment of malignant disease. The journal publishes significant clinical studies from cancer programs around the world, along with important translational laboratory findings, mini-reviews (invited and submitted) and in-depth discussions of evolving and controversial topics in the oncology arena. A unique feature of the journal is a section which focuses on rapid peer-review and subsequent publication of short reports of phase 1 and phase 2 clinical cancer trials, with a goal of ensuring that high-quality clinical cancer research quickly enters the public domain, regardless of the trial’s ultimate conclusions regarding efficacy or toxicity.

Oncology Research and Treatment

Oncology Research and Treatment offers an interdisciplinary forum for cancer research and treatment. Peer-reviewed original and review articles cover a wide range of aspects in medical hematology and oncology, surgical, neurosurgical, gynecological, pediatric and urological oncology, oral and maxillofacial surgery, dermatological oncology, diagnostics, radiation oncology, psychological care, pathology, clinical-experimental oncology, biometry, and oncological rehabilitation. Continuous medical education and clinical news form a further focus. Compact and current, Oncology Research and Treatment keeps both clinicians and researchers up to date.

Ophthalmic Research

Journal for Translational and Clinical Research

Editor
José Cunha-Vaz, Coimbra

‘Ophthalmic Research is a well-established scientific journal dedicated to facilitate communication between the eye research community. Its main objective is to offer a platform for the best contributions in every area of eye research, including fundamental research and clinical research giving particular attention to the transfer of knowledge from the laboratory bench to the patient, i.e. translational research. It is generally acknowledged today that the value of vision is continually increasing in modern day life.’

Published since 1899, *Ophthalmologica* has become a frequently cited guide to international work in clinical and experimental ophthalmology. It contains a selection of patient-oriented contributions covering the etiology of eye diseases, diagnostic techniques, and advances in medical and surgical treatment, with special emphasis on retinal diseases. In addition to original papers, *Ophthalmologica* features regularly timely reviews in an effort to keep the reader well informed and updated. The large international circulation of this journal reflects its importance.

**Ophthalmologica**

**Editor**

S. Wolf, Bern

*Ophthalmologica* is the only European journal focused on clinical research in vitreo-retinal diseases. This special focus has attracted many readers and scientists to submit their excellent work to *Ophthalmologica* for publication.

**Clinical research in ophthalmology with special focus on management of retina and vitreous diseases**
ORL contains concise, original scientific papers of interest for both clinicians and researchers in oto-rhino-laryngology and head and neck surgery. Contributions drawn from the basic sciences cover new knowledge on the anatomy, pathology, pathophysiology, immunology and tumor biology of head and neck and the auditory and vestibular system, the salivary glands, paranasal sinuses and of the organs of the upper respiratory and digestive tract. The practical value of the journal is accentuated by reports of clinical progress in diagnosis and therapy.

High Impact Reports in ORL:
These papers focus on novel and exciting translational and clinical research. They have an expedited review process of two weeks and are published within two months of acceptance. High impact reports are limited to four printed pages and should be submitted explicitly for this section.

Impact Factor: 1.0
Pathobiology offers a valuable platform for the publication of high-quality original research into the mechanisms underlying human disease. Aiming to serve as a bridge between basic biomedical research and clinical medicine, the journal welcomes articles from scientific areas such as pathology, oncology, anatomy, virology, internal medicine, surgery, cell and molecular biology, and immunology. Published bimonthly, Pathobiology features original research papers and reviews on translational research. The journal offers the possibility to publish proceedings of meetings dedicated to one particular topic.

Pediatric Neurosurgery

Pediatric Neurosurgery strives to publish new information and observations in pediatric neurosurgery, neurology, neuroradiology and neuropathology. The focus is on the etiology of neurologic diseases, the operative care of affected patients and outcomes research. In addition to experimental and clinical studies, the journal presents critical reviews on selected topics as well as case histories and reports on advances in surgical technique. This thought-provoking approach encourages dissemination of information from neurosurgeons and neuroscientists around the world. Published material will be of interest to both researchers and clinicians who study and care for patients with pediatric, congenital, and developmental diseases of the nervous system.

**Pharmacology**

*International Journal of Experimental and Clinical Pharmacology*

**Editors**

J. Donnerer, Graz  
K. Takeuchi, Kyoto  
K.E. Vrana, Hershey, Pa.

**Pharmacology** is an international forum to present and discuss current perspectives in drug research. The journal communicates research in basic and clinical pharmacology and related fields. It covers biochemical pharmacology, molecular pharmacology, immunopharmacology, drug metabolism, pharmacogenetics, analytical toxicology, neuropsychopharmacology, pharmacokinetics and clinical pharmacology. In addition to original papers and short communications of investigative findings and pharmacological profiles, the journal contains reviews, comments and perspective notes; research communications of novel therapeutic agents are encouraged.

Contemporary interdisciplinary research on phonetics employs a wide range of approaches, from instrumental measures to perceptual and neurocognitive procedures, to computational modelling, for investigating the properties and principles of phonetics in communicative settings across the world’s languages. It also ranges across styles, types of language users, and communicative modalities (speech, sign, song).

Phonetica is an international forum for phonetic science that covers all aspects of the subject matter, from phonetic and phonological descriptions, to articulatory and signal analytic measures of production, to perception, acquisition, and phonetic variation and change. Phonetica thus provides a platform for a comprehensive understanding of producer-perceiver interaction across languages and dialects, and of learning throughout the lifespan and across contexts. Papers published in this journal report expert original work that deals both with theoretical issues, new empirical data, and innovative methods and applications that help to advance the field.

Phonetica

Psychopathology is a record of research centered on findings, concepts, and diagnostic categories of phenomenological, experimental and clinical psychopathology. Studies published are designed to improve and deepen the knowledge and understanding of the pathogenesis and nature of psychopathological symptoms and psychological dysfunctions. Furthermore, the validity of concepts applied in the neurosciences of mental functions are evaluated in order to closely bring together mind and brain. Major topics of the journal are trajectories between biological processes and psychological dysfunction that can help us better understand a subject’s inner experiences and interpersonal behavior. Descriptive psychopathology, experimental psychopathology and neuropsychology, developmental psychopathology, transcultural psychiatry as well as philosophy-based phenomenology contribute to this field.
As the volume of literature in the fields of psychotherapy and psychosomatics continues to grow, it becomes increasingly difficult to keep abreast of new and important developments, and to have independent, critical views on key clinical issues concerned with assessment and treatment of mental disorders. Psychotherapy and Psychosomatics has progressively increased its reputation for independence, originality and methodological rigor. It has anticipated and developed new lines of research concerned with psychosomatic medicine, psychotherapy research and psychopharmacology. The journal features editorials and reviews on current and controversial issues; innovations in assessment and treatment; case management articles; original investigations; literature updates; and a lively correspondence section. It has become a unique and vital reference to current research and practice, the home of innovative thinking at the interface between medical and behavioral sciences.

Public Health Genomics is the leading international journal focusing on the timely translation of genome-based knowledge and technologies into public health, health policies, and healthcare as a whole. This peer-reviewed journal is a bi-monthly forum featuring original papers, reviews, short communications, and policy statements. It is supplemented by topic-specific issues providing a comprehensive, holistic 'all-inclusive' picture of the chosen subject. Multidisciplinary in scope, it combines theoretical and empirical work from a range of disciplines, notably public health, molecular and medical sciences, the humanities and social sciences. In so doing, it also takes into account rapid scientific advances from fields such as systems biology, microbiomics, epigenomics or information and communication technologies as well as the high potential of 'big data' for public health.

What was until very recently no more than a vision for a new era of public health, in which advances in the '-omic' sciences would be integrated into strategies aiming at benefiting population health, has now become a response to the very pressing need for the development of effective personalized healthcare which is complementary to health protection and health promotion. The aim of Public Health Genomics is to facilitate a broad dialogue between academia, the private sector and government bodies.

The journal Pulse publishes full-length reviews, mini reviews, and original papers in the field of vascular research. Bringing together the basic and clinical sciences across a range of disciplines, Pulse provides a forum for communication of the latest findings and hypotheses that enhance our understanding of pulsatile processes and vascular disease. The transdisciplinary approach of the journal fosters collaboration in relevant areas including cardiology, nephrology, neurology, endocrinology and diabetology, gerontology and general medicine. All articles are subject to rigorous peer-review in order to maintain the highest standards of publication. The editors welcome submissions from all areas of vascular research, including but not limited to epidemiology, pathophysiology, diagnostics, therapeutics and prevention. Online-first publication ensures prompt dissemination of accepted papers to a multidisciplinary audience with an interest in vascular research.

Respiration brings together the results of both clinical and experimental investigations on all aspects of the respiratory system in health and disease. Clinical improvements in the diagnosis and treatment of chest and lung diseases are covered, as are the latest findings in physiology, biochemistry, pathology, immunology and pharmacology. The journal includes classic features such as editorials that accompany original articles in clinical and basic science research, reviews and letters to the editor. Further sections are: The Eye Catcher, What’s Your Diagnosis?, New Insights from Clinical Practice and Guidelines. Respiration is the official journal of the Swiss Respiratory Society (SGP) and also home to the European Association for Bronchology and Interventional Pulmonology (EABIP), which occupies a dedicated section on Interventional Pulmonology in the journal. This modern mix of different features and a stringent peer-review process by a dedicated editorial board make Respiration a complete guide to progress in thoracic medicine.

Recent discoveries in experimental and clinical research have led to impressive advances in our knowledge of the genetic and environmental mechanisms governing sex determination and differentiation, their evolution as well as the mutations or endocrine and metabolic abnormalities that interfere with normal gonadal development. Sexual Development provides a unique forum for this rapidly expanding field. Its broad scope covers all aspects of genetics, molecular biology, embryology, endocrinology, evolution and pathology of sex determination and differentiation in humans and animals. It publishes high-quality original research manuscripts, review articles, short reports, case reports and commentaries. An internationally renowned and multidisciplinary editorial team of three chief editors, ten prominent scientists serving as section editors, and a distinguished panel of editorial board members ensures fast and author-friendly editorial processing and peer reviewing.

Skin Appendage Disorders provides a wide range of original and review articles dealing with all aspects of hair, nail and skin glands. The section ‘Novel Insights from Clinical Practice’ introduces special case examples and their treatments. Innovative therapies are presented under the heading ‘Novel Treatments’, and in ‘Clinical Investigations’ the latest findings are discussed. A special highlight are the articles in the section ‘Guidelines’ that present the consensus treatments, and which are a must-read for everyone who wants to stay up-to-date. The section ‘Adnexal Surgery’ focuses on both established and approved as well as new surgical treatments. Pathological evaluation of skin appendage disorders requires specific training and the ‘Pathology’ section will be open to original papers and reviews on this topic.

Covering all aspects of the field, Skin Appendage Disorders is of primary importance for dermatologists in clinics and research, dermatological surgeons as well as cosmetic dermatologists.

The venue for research on new drugs and therapeutic concepts

Skin Pharmacology and Physiology
Journal of Pharmacological and Biophysical Research

Editor
J. Lademann, Berlin

Honorary Editor
H.F. Merk, Aachen

Associate Editors
P. Elias, San Francisco, Calif.
J.W. Fluhr, Berlin
H.I. Maibach, San Francisco, Calif.
H. Mukhtar, Madison, Wis.
G. Nohynek, Asnières
M. Roberts, Brisbane, Qld.
C. Surber, Basel
P. van de Kerkhof, Nijmegen

In the past decade research into skin pharmacology has rapidly developed with new and promising drugs and therapeutic concepts being introduced regularly. Recently, the use of nanoparticles for drug delivery in dermatology and cosmetology has become a topic of intensive research, yielding remarkable and in part surprising results. Another topic of current research is the use of tissue tolerable plasma in wound treatment. Stimulating not only wound healing processes but also the penetration of topically applied substances into the skin, this novel technique is expected to deliver very interesting results.

There are many open questions which reflect the importance of the subject and the need for an international scientific forum where they can be discussed in extenso. Dermatologists, pharmaceutical chemists, pharmacologists, toxicologists, and others interested in the subject are invited to contribute and to submit their best research work for publication in Skin Pharmacology and Physiology.

Stereotactic and Functional Neurosurgery provides a single source for the reader to keep abreast of developments in the most rapidly advancing subspecialty within neurosurgery. Technological advances in computer-assisted surgery, robotics, imaging and neurophysiology are being applied to clinical problems with ever-increasing rapidity in stereotaxis more than any other field, providing opportunities for new approaches to surgical and radiotherapeutic management of diseases of the brain, spinal cord, and spine. Issues feature advances in the use of deep-brain stimulation, imaging-guided techniques in stereotactic biopsy and craniotomy, stereotactic radiosurgery, and stereotactically implanted and stereotactically guided radiotherapeutics and biologicals in the treatment of functional and movement disorders, brain tumors, and other diseases of the brain. Background information from basic science laboratories related to such clinical advances provides the reader with an overall perspective of this field. Proceedings and abstracts from many of the key international meetings furnish an overview of this specialty available nowhere else.

Stereotactic and Functional Neurosurgery meets the information needs of both investigators and clinicians in this rapidly advancing field.

This journal is devoted to all areas of transfusion medicine. These include the quality and security of blood products, therapy with blood components and plasma derivatives, transfusion-related questions in transplantation, stem cell manipulation, therapeutic and diagnostic problems of homeostasis, immuno-hematological investigations, and legal aspects of the production of blood products as well as hemotherapy. Both comprehensive reviews and primary publications that detail the newest work in transfusion medicine and hemotherapy promote the international exchange of knowledge within these disciplines. Consistent with this goal, continuing clinical education is also specifically addressed.
Concise but fully substantiated international reports of clinically oriented research into the science and current management of urogenital disorders form the nucleus of original as well as basic research papers. These are supplemented by up-to-date reviews by international experts on the state-of-the-art of key topics of clinical urological practice. Essential topics receiving regular coverage include the introduction of new techniques and instrumentation as well as the evaluation of new functional tests and diagnostic methods. Special attention is given to advances in surgical techniques and clinical oncology. The regular publication of selected case reports represents the great variation in urological disease and illustrates treatment solutions in singular cases.

Die Zeitschrift Verhaltenstherapie bildet das breite Spektrum verhaltenstherapeutischer Verfahren ab und ist im deutschen Sprachraum das führende Publikationsorgan ihres Fachgebiets. Um die publizierten Beiträge einem möglichst breiten und internationalen Fachpublikum zugänglich zu machen, bietet Verhaltenstherapie einen besonderen Service: Mit dem Konzept «Deutsch schreiben – Englisch publizieren» haben Autoren die Möglichkeit, ihre angenommenen Arbeiten gegen eine Kostenbeteiligung professionell übersetzen zu lassen. Die übersetzten Beiträge werden als PDF-Datei kostenlos über die Homepage des Verlags zur Verfügung gestellt.

Verhaltenstherapie ist das offizielle Organ von 21 Ausbildungsinstituten, Gesellschaften und Verbänden in Deutschland, Österreich und der Schweiz und bietet Wissenschaftlern und Therapeuten eine umfassende Auswahl an Beiträgen aus Theorie und Praxis.

This interdisciplinary journal is unique in its field as it covers the principles of both gastrointestinal medicine and surgery required for treating abdominal diseases. In each issue invited reviews provide a comprehensive overview of one selected topic. Thus, a sound background of the state of the art in clinical practice and research is provided. A panel of specialists in gastroenterology, surgery, radiology, and pathology discusses different approaches to diagnosis and treatment of the topic covered in the respective issue. Original articles, case reports, and commentaries make for further interesting reading.

The journal is a valuable source of information, imparting essential knowledge for mastering the major interdisciplinary challenges in gastrointestinal medicine and surgery.

The interdisciplinary ‘hub’ for researchers, clinicians and public health professionals

Biomedicine Hub

www.biomedicinehub.com

• open access
• peer-reviewed
• fast online publication

An international Editorial Board with more than 170 renowned specialists guarantees high-quality and relevant content.

There is currently no Article Processing Charge (APC).

Biomedicine Hub is an interdisciplinary journal: a ‘hub’ for researchers, clinicians and public health professionals across biomedical disciplines to share research findings, ideas, theories, experimental results and clinical experience. Biomedicine Hub aims at facilitating the exchange of knowledge between disciplines, with a focus on translational science for the development of cutting-edge technologies and the improvement of health care. A further focus is on emerging interdisciplinary fields at the forefront of medicine.
This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of dermatology, including prevention, diagnosis, treatment, toxicities of therapy, supportive care, quality-of-life, and survivorship issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed.

The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the entire growing collection of case reports, further facilitating the retrieval of specific information.

Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of gastroenterology. Clinicians and researchers are given a tool to disseminate their personal experience to a wider public as well as to review interesting cases encountered by colleagues all over the world. To complement the contributions supplementary material is welcomed. The reports are organized according to the classification used by the American Gastroenterological Association Institute; it will be possible to search across the entire growing collection of case reports with universally used terms, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.
Case Reports in Nephrology and Dialysis

www.karger.com/cnd

• open access
• peer-reviewed
• fast online publication

This peer-reviewed online-only journal publishes original case reports covering the entire spectrum of nephrology and dialysis, including genetic susceptibility, clinical presentation, diagnosis, treatment or prevention, toxicities of therapy, critical care, supportive care, quality-of-life and survival issues. The journal will also accept case reports dealing with the use of novel technologies, both in the arena of diagnosis and treatment. Supplementary material is welcomed.

The intent of the journal is to provide clinicians and researchers with a tool to disseminate their personal experiences to a wider public as well as to review interesting cases encountered by colleagues all over the world. Universally used terms can be searched across the growing collection of case reports, further facilitating the retrieval of specific information. Following the open access principle, the entire contents can be retrieved at no charge, guaranteeing easy access to this valuable source of anecdotal information at all times.

Cellular Physiology and Biochemistry is a multidisciplinary scientific forum dedicated to advancing the frontiers of basic cellular research. It addresses scientists from both the physiological and biochemical disciplines as well as related fields such as genetics, molecular biology, pathophysiology, pathobiochemistry and cellular toxicology & pharmacology. Original papers and reviews on the mechanisms of intracellular transmission, cellular metabolism, cell growth, differentiation and death, ion channels and carriers, and the maintenance, regulation and disturbances of cell volume are presented. Appearing monthly under peer review, Cellular Physiology and Biochemistry takes an active role in the concerted international effort to unravel the mechanisms of cellular function.
This open access and online-only journal publishes original articles covering the entire spectrum of stroke and cerebrovascular research, drawing from a variety of specialties such as neurology, internal medicine, surgery, radiology, epidemiology, cardiology, hematology, psychology and rehabilitation. Offering an international forum, it meets the growing need for sophisticated, up-to-date scientific information on clinical data, diagnostic testing, and therapeutic issues. The journal publishes original contributions, reviews of selected topics as well as clinical investigative studies. All aspects related to clinical advances are considered, while purely experimental work appears only if directly relevant to clinical issues.

*Cerebrovascular Diseases Extra* provides additional contents based on reviewed and accepted submissions to the main journal *Cerebrovascular Diseases*.
Current Urology is an international peer-reviewed journal providing practical, timely, and state-of-the-art contributions on clinical research and experience in urology.

The journal encompasses all aspects of basic urological research, surgical and medical oncology, radiology, pathology, urolithiasis, andrology, reconstruction surgery, pediatric urology, female urology and urodynamics, erectile dysfunction, infertility, urinary infections and inflammations, endourology, and transplantation. Each issue contains reviews, original articles, surgical techniques, case reports, book reviews and correspondence. It is published online and in print. Urologists, oncologists, pathologists, radiologists and scientists are invited to hand in their contributions to make Current Urology a viable international forum on latest findings in research and practice in urology.

Current Urology is an international journal for new findings in urology!
This open access and online-only journal publishes original articles covering the entire spectrum of cognitive dysfunction such as Alzheimer’s and Parkinson’s disease, Huntington’s chorea and other neurodegenerative diseases.

The journal draws from diverse related research disciplines such as psychogeriatrics, neuropsychology, clinical neurology, morphology, physiology, genetic molecular biology, pathology, biochemistry, immunology, pharmacology and pharmaceutics. Strong emphasis is placed on the publication of research findings from animal studies which are complemented by clinical and therapeutic experience to give an overall appreciation of the field.

Dementia and Geriatric Cognitive Disorders Extra provides additional contents based on reviewed and accepted submissions to the main journal Dementia and Geriatric Cognitive Disorders.
Dermatopathology is a peer-reviewed online-only journal publishing original scientific articles dealing with diagnostic and experimental human and animal studies in dermatopathology. Contributions to clinicopathological correlations, studies based on current molecular technologies as well as controversial issues and case reports are welcome. The aim of the journal is to share interesting and most recent clinicopathological information with the community of dermatopathologists all over the world and to create a stronger link between dermatopathology, clinical dermatology and investigative dermatology. Dermatopathology also provides a resource for continuing medical education in cutaneous pathology. After acceptance, articles are published online very quickly, ensuring the rapid availability of scientific knowledge for all clinicians and researchers interested in this specialty. According to the open-access principle, the contents of the journal can be retrieved at all times without any charge.
An intersection for conventional and alternative medicine

Integrative Medicine International

www.karger.com/imi

• peer-reviewed
• fast online publication
• no limitation on article length
• no publication fee

Integrative Medicine International is a peer-reviewed open access journal that serves as an instant media platform for those wishing to publish research reports and any other relevant content dealing with diagnosis, evaluation and therapy. The journal focuses on the latest trends and developments, experiences and achievements in all areas of integrative medicine, complementary and alternative medicine (CAM), as well as advances in the attempt to modernize traditional medicine. This includes traditional herbal medicine, acupuncture, tai chi, chiropractic, massage, mind-body therapy (music therapy), yoga therapy, Ayurveda, creative therapy, nutrition counseling and exercise programs.

Manuscripts can be submitted in the form of original articles, review articles, herb-drug interaction reports, clinical trials and clinical experiences. The objective of the journal is to publish new methods in research and therapy to complement and extend the methods of western medicine. Due to its integrative and cross-disciplinary approach, the journal should be of interest to readers worldwide.

This journal comprises both clinical and basic studies at the interface of nephrology, hypertension and cardiovascular research. The topics to be covered include the structural organization and biochemistry of the normal and diseased kidney, the molecular biology of transporters, the physiology and pathophysiology of glomerular filtration and tubular transport, endothelial and vascular smooth muscle cell function and blood pressure control, as well as water, electrolyte and mineral metabolism. Also discussed are the (patho)physiology and (patho)biochemistry of renal hormones, the molecular biology, genetics and clinical course of renal disease and hypertension, the renal elimination, action and clinical use of drugs, as well as dialysis and transplantation. Featuring peer-reviewed original papers, editorials translating basic science into patient-oriented research and disease, in depth reviews, and regular special topic sections, *Kidney & Blood Pressure Research* is an important source of information for researchers in nephrology and cardiovascular medicine.

Aims and Scope

*Medical Principles and Practice*, as the journal of the Health Sciences Centre, Kuwait University, aims to be a publication of international repute that will be a medium for dissemination and exchange of scientific knowledge in the health sciences.

Selected contributions

- Most Important Chronic Complications of Arteriovenous Fistulas for Hemodialysis: Stolic, R. (Kosovska Mitrovica, Serbia)
- Sonographic Assessment of Renal Size in Healthy Adults: El-Reshaid, W. (Safat, Kuwait); Abdul-Fattah, H. (Kuwait City, Kuwait)
- Primary Health Care and Public Health: Foundations of Universal Health Systems: White, F. (Victoria, B.C., Canada/Halifax, N.S., Canada)
- Tumor Markers in Clinical Practice: A Review Focusing on Common Solid Cancers: Duffy, M.J. (Dublin, Ireland)
- Interactions between Herbs and Conventional Drugs: Overview of the Clinical Data: Izzo, A.A. (Naples, Italy)

Submit your paper free of charge to this open access journal

Neurosignals is an international journal dedicated to publishing original articles, reviews and short reports in the field of neuronal communication. Novel findings related to signaling machinery, pathways and networks that are associated with development and functioning of the nervous system are most welcome. Reported observations should significantly contribute to the advancement of our understanding of neuronal signaling and be presented in a format applicable to an interdisciplinary readership. Manuscripts addressing the journal’s topics of discussion from a bioinformatics perspective will also be considered for publication.

Obesity Facts publishes articles covering all aspects of obesity, in particular epidemiology, etiology and pathogenesis, treatment, and the prevention of adiposity. As obesity is related to many disease processes, the journal is also dedicated to all topics pertaining to comorbidity and covers psychological and sociocultural aspects as well as influences of nutrition and exercise on body weight. The editors carefully select papers to present only the most recent findings in clinical practice and research. All professionals concerned with obesity issues will find this journal a most valuable update to keep them abreast of the latest scientific developments.

Special sections comprising a variety of subspecialties reinforce the journal’s value as an exhaustive record of recent progress for all internists, gastroenterologists, endocrinologists, pediatricians, dieticians, nutritionists, bariatric surgeons, psychologists and psychiatrists, occupational health practitioners, sports medicine specialists, ecotrophologists, sociologists, and biologists as well as prevention and public health researchers. In addition, Obesity Facts serves as an ideal information tool for the members of the pharmaceutical and food industry as well as those active in nutritional research and medicine.

Well-Being Therapy
Treatment Manual and Clinical Applications

Well-Being Therapy (WBT) is the psychotherapeutic approach developed by Giovanni Fava, a world-renowned psychiatrist and psychotherapist. WBT is an innovative strategy that is based on monitoring psychological well-being, whereby the patient progressively learns how to make it grow. This type of therapy has enjoyed much success and is increasing in popularity around the world. It is therefore not just of interest to professionals but also to counselors, educators and patients.

XIV + 148 p., 6 fig., 66 tab., soft cover, 2016
CHF 31.00 / EUR 30.00 / USD 34.00

‘The publication of this first book on Well-Being Therapy (WBT) is a landmark event.’
Jesse H. Wright (University of Louisville, Ky.)

Novel data and theories to advance our understanding of mental illness

Biological psychiatry contributes a new and exciting dimension to the knowledge of abnormal human behavior. By focussing on the biological determinants of behavior and psychopathology, the volumes in the series provide clinicians and researchers with timely updates on the most significant work conducted in selected areas internationally. Most significant progress comes from interdisciplinary collaboration, so that methodological contributions from the biological and psychological sciences are juxtaposed with clinical, more practical updates.

**Advances in Psychosomatic Medicine**

Balanced information on the relationships between psychological and biological phenomena

The importance of psychosomatic research has been greatly reinforced by evidence demonstrating that psychological phenomena may have distinct effects on human health. Recognizing the complexity of interactions between personality and physical illness, this series employs an interdisciplinary strategy to explore areas where knowledge from psychosomatic medicine may aid in the prevention of specific diseases or help meet the emotional demands of hospitalized patients. In each work, the editor has managed to bring together distinguished contributors, creating a series of coherent and comprehensive reviews on a variety of novel topics.

**Aesthetic Dermatology**

An innovative global approach to evidence-based aesthetic medicine

In the new book series Aesthetic Dermatology, innovations in techniques, such as laser therapy, as well as pharmacologic and cosmetic procedures are presented. Each volume is edited by one or several authorities in their respective field who invite contributors from all over the world to share their versatile experience. Thoroughly researched and evidence-based findings are discussed along with innovations in therapy. The series represents an update on key areas of aesthetic dermatology that will interest both plastic surgeons and aesthetic dermatologists.

Chemical Immunology and Allergy

‘... There can be few immunologists in a position to ignore the help provided by these timely reviews ... essential reading for virtually all immunologists.’

Immunology

Appearing for the first time in 1939, Progress in Allergy was the first and, for many years, the only international review series in the English language devoted to immunology. The present title, Chemical Immunology and Allergy, reflects the rapidly increasing role of concepts and techniques of molecular and cell biology, as well as the greater emphasis now being placed on research into the biologic problems of immunology, hypersensitivity and immunopathology. Highly specialized, single-topic volumes keep both investigators and practicing physicians up to date with the latest developments in areas of immunology and allergy where recent research has been concentrated.

Contributions to Nephrology

‘... an invaluable collection on the nephrologist’s personal bookshelf.’

Journal of the Royal Society of Medicine

The speed of developments in nephrology has been fueled by the promise that new findings may improve the care of patients suffering from renal disease. Participating in these rapid advances, this series has released an exceptional number of volumes that discuss of innovative treatment strategies to critical evaluations of investigative findings. Participating in these rapid advances, this series has released an exceptional number of volumes that discuss innovative treatment strategies to critical evaluations of investigative findings that may improve the care of patients suffering from renal disease. Participating in these rapid advances, this series has released an exceptional number of volumes that discuss innovative treatment strategies to critical evaluations of investigative findings that may improve the care of patients suffering from renal disease.

Book Series 109
Current Problems in Dermatology

Well-referenced and timely reports from the most active areas of dermatology and skin research

This series presents a selection of new ideas and information in the field of clinical and investigative dermatology. Crossing the borders of skin diseases it explores interdisciplinary strategies, linking dermatology with immunology, allergology and other research areas. Each volume is individually designed to provide an up-to-date presentation of new and interesting topics in dermatology and skin research. The contributing authors are acknowledged experts in their fields. The wide range of topics discussed includes normal and pathological skin conditions, the development of new equipment, drugs and analytical techniques, and recent advances in the treatments that can be offered to patients.

Developments in Ophthalmology

Combines authoritative reviews with reports on new experimental findings

The book series Developments in Ophthalmology provides ophthalmologists, ophthalmic surgeons and practicing optometrists with expert reviews highlighting the most important developments in their field. Innovative procedures from a wide range of areas – such as corneal or macular disorders, pharmacological issues, OCT and many more – are presented with the appropriate technical information required to encourage rapid introduction into clinical practice. For each volume expert authors producing articles of only the highest standards are invited to present their knowledge. During the considerable history of its existence Developments in Ophthalmology has established itself as an essential reference in the field of ophthalmology.
Endocrine Development

Communicating scientific advances in a clinical context

This series is devoted to specific areas of fetal, neonatal, pediatric and adolescent endocrinology. It addresses a wide range of relevant issues in the context of a well-defined subject and covers new areas of clinical and basic research. Clear evidence-based guidelines on clinical management by highly qualified basic and clinical scientists who present their clinically relevant recent findings are also provided. Bringing together experts from related disciplines such as fetal and perinatal medicine, epidemiology, public health, molecular endocrinology, the volumes cover a broad spectrum in endocrine development.

Vol. 31: Novelties in Diabetes
Editors: Stettler, C.; Christ, E.; Diem, P. (Bern)
Vi + 226 p., 35 fg., 14 in color, 11 tab., 2016
CHF 198.00 / EUR 185.00 / USD 233.00 (hardcover or online*)
CHF 238.00 / EUR 222.00 / USD 280.00 (online**)

Vol. 30: Advanced Therapies in Pediatric Endocrinology and Diabetology
Editors: Cappa, M.; Cianfarani, S. (Rome); Ghizzoni, L. (Turin); Loche, S. (Geneva); Maghnie, M. (Genoa)
VIII + 166 p., 27 fg., 6 in color, 10 tab., 2016
CHF 168.00 / EUR 157.00 / USD 198.00 (hardcover or online*)
CHF 202.00 / EUR 188.00 / USD 238.00 (online**)

Vol. 29: Puberty from Bench to Clinic
Lessons for Clinical Management of Pubertal Disorders
Editors: Bourguignon, J.-P.; Parent, A.-S. (Liège)
VIII + 146 p., 152 fg., 22 in color, 43 tab., 2015
CHF 247.00 / EUR 231.00 / USD 291.00 (hardcover or online*)
CHF 296.00 / EUR 277.00 / USD 349.00 (online**)

Vol. 28: Calcium and Bone Disorders in Children and Adolescents
2nd, revised edition
Editors: Allgrove, J. (London); Shaw, N.J. (Birmingham)
VIII + 454 p., 152 fg., 22 in color, 43 tab., 2015
CHF 247.00 / EUR 231.00 / USD 291.00 (hardcover or online*)
CHF 296.00 / EUR 277.00 / USD 349.00 (online**)

ESASO Course Series

Expert presentations made available in print

This book series makes the essentials of the courses of the European School for Advanced Studies in Ophthalmology (ESASO) available to interested ophthalmologists, optometrists, technicians and residents all over the world. The presentations of the courses are published regularly featuring a wide range of ophthalmological topics from vitreoretinal pathology to retinal surgery, retinal diseases, cornea and refractive surgery or cataract.

Vol. 7: Ocular Tumors
Editors: Singh, A.D. (Cleveland, Ohio); Seregard, S. (Stockholm)
CHF 98.00 / EUR 92.00 / USD 115.00 (softcover or online*)
CHF 118.00 / EUR 110.00 / USD 138.00 (online**)

Vol. 6: Cornea
Editor: Güell, I. (Barcelona)
VIII + 128 p., 85 fg., 81 in color, 9 tab., 2015
CHF 98.00 / EUR 92.00 / USD 115.00 (softcover or online*)
CHF 118.00 / EUR 110.00 / USD 138.00 (online**)

Vol. 5: Orbital Surgery
Editors: Meitel, R.; Vázquez, L.M. (Barcelona)
VIII + 116 p., 87 fg., 82 in color, 3 tab., 2014
CHF 98.00 / EUR 92.00 / USD 115.00 (softcover or online*)
CHF 118.00 / EUR 110.00 / USD 138.00 (online**)

Vol. 4: Optical Coherence Tomography
Editors: Coscas, G. (Citéret/Paris); Lowenstein, A. (Tel Aviv); Bandello, F. (Milan)
XII + 134 p., 137 fg., 97 in color, 9 tab., 2014

**Frontiers of Gastrointestinal Research**

A guide to leading investigations in the field of gastroenterology

This series is designed for both the physician active in the clinical practice of gastroenterology and the gastroenterologist or student engaged in research. Each volume offers a ready reference guide to current progress and a review of past achievement in a particular area of gastrointestinal study. The series covers pathological, pharmacological, diagnostic and therapeutic considerations relating to the digestive system, as well as the latest techniques and instrumentation used in the management of gastrointestinal disorders.

---

**Frontiers in Diabetes**

Scientific advances in current clinical and experimental research

Data at the fronts of diabetes research are collected, systematically organized, and critically evaluated by volumes in this series. Contents are based on recent findings published in the medical literature and reflect the most advanced achievements in current clinical and experimental research on diabetes and allied disorders. By giving these data coherent organization and critical interpretation, the editor and authors of *Frontiers in Diabetes* perform a major service for all scientists conducting experimental or clinical work in the field.

Frontiers of Hormone Research

A series of integrated overviews on cutting-edge topics

New sophisticated technologies and methodological approaches in diagnostics and therapeutics have led to significant improvements in identifying and characterizing an increasing number of medical conditions, which is particularly true for all aspects of endocrine and metabolic dysfunctions. Novel insights in endocrine physiology and pathophysiology allow for new perspectives in clinical management and thus lead to the development of molecular, personalized treatments. In view of this, the active interplay between basic scientists and clinicians has become fundamental, both to provide patients with the most appropriate care and to advance future research.

The individual volumes of this series explore cutting-edge topics in the field of endocrinology and metabolism, providing the most updated, critical opinions of international leading researchers and clinicians. Going from in vitro studies to daily clinical applications, each volume presents a state-of-the-art overview including a discussion of future perspective.

Frontiers of Oral Biology

The past two decades have witnessed a rapid advance in the theoretical and technical development of dental and oral medicine, coupled with a substantial increase in the qualitative and quantitative demands made upon dentists by their patients. This series is designed for today’s dentists who, because of the growing scope of their field, must display more than just a familiarity with all areas of oral physiology, whether fundamental or highly specialized. The series has received repeated praise for its systematic and well-referenced treatment of vital topics.

Interdisciplinary Topics in Gerontology and Geriatrics

A comprehensive approach to the problems of aging

At a time when interest in the process of aging is driving more and more research, Interdisciplinary Topics in Gerontology and Geriatrics offers investigators a way to stay at the forefront of developments. This series represents a comprehensive and integrated approach to the problems of aging and presents pertinent data from studies in animal and human gerontology. In order to provide a forum for a unified concept of gerontology, both the biological foundations and the clinical and sociological consequences of aging in humans are presented. Individual volumes are characterized by an analytic overall view of the aging process, novel ideas, and original approaches to healthy aging as well as age-related functional decline.
Issues in Infectious Diseases

Infections are a constant threat to human health. Over the last two decades a number of new infective agents such as HIV and prions have been identified, and several infectious diseases previously considered under control have suddenly reemerged. The problem of infection is aggravated by the resistance of many microorganisms to currently available antibiotics and by the growing number of immuno-compromised people worldwide. The steadily rising incidence of nosocomial infections is a further cause for concern. This series presents original data and reviews the latest clinical information on infectious diseases of bacterial, viral, fungal and parasitic origin. Covering epidemiology, pathogenesis, prevention and treatment, it also considers the latest diagnostic techniques, evaluates new antimicrobial drugs and reports recent advances in vaccine development. As infections involve almost all branches of medicine, books published in this series represent a valuable source of information for a wide spectrum of clinicians and health care professionals.

Key Issues in Mental Health

Problems of clinical psychiatry covered in a series that has helped pioneer the development of this field

With its first volume published in 1917, this series has served to chart some of the main developments of contemporary psychiatry. Throughout these years, individual volumes have outlined the specific problems and controversies which have characterized the growth of psychiatry and have reflected a broadening acceptance of its methods and applications. Recent volumes have been distinguished by their bench to bedside coverage of current topics in psychiatry, psychology and neurosciences. Taking a rigorously interdisciplinary as well as translational approach, Key Issues in Mental Health attempts to build bridges to related disciplines in an effort to integrate a variety of aspects relevant to the successful diagnosis and treatment of psychiatric disorders.
Medicine and Sport Science

These works invite study by anyone interested in the development of sports medicine and sport science as dynamic scientific disciplines

This series was inaugurated at a time when the sport sciences were separated from medicine. From the first volume on, the editors have united these two areas in order to bridge the gap between medicine and sport sciences and to give the scientific community at large, and biomedical researchers in particular, the full benefit of current advances being made in the multifaceted domains of sports medicine. Contributions from biomechanics, biochemistry, physiology, kinanthropometry engineering, and from different areas of clinical medicine are incorporated into this innovative series.

Modern Trends in Pharmacopsychiatry

Focussing on the effects of drug treatment on psychiatric and neurological disorders, this series is concerned with the mechanisms of action of psychotropic drugs, their adverse effects as well as the science and experience behind the development of new compounds. On the basis of our growing understanding of the interaction between physical ill health and psychiatric illness, Modern Trends in Pharmacopsychiatry also investigates the biological and psychological factors that may impact on a patient’s response to psychotropic treatment. Written by international experts who have contributed to the advances in the field of pharmacopsychiatry, this series provides cutting-edge research and clinical information, including the latest developments, methods and limitations of current clinical trials.

Monographs in Clinical Cytology

Introducing improved diagnostic techniques and procedures

Monographs in this series have given the field of cytology an outstanding set of reference works. Volumes perform the important function of correlating extensive basic and clinical findings and applying these to discuss how innovations in cytology can improve patient diagnosis and management. Readers will find descriptions of techniques offering greater simplicity, speed, patient comfort and cost effectiveness as well as improved diagnostic precision.

Monographs in Human Genetics

Results of sophisticated genetic studies

Human genetics represents a highly diversified field covering an ever-increasing number of topics ranging from basic research to medical practice. The well-established book series Monographs in Human Genetics focuses on important hereditary diseases, their molecular basis, clinical impact and eventual treatment. With its concise but high-informative reviews by experts from different fields, Monographs in Human Genetics provides essential reading not only for researchers but also for physicians and students interested in specific genetic diseases.

Vol. 21: FNA Cytology of Ophthalmic Tumors
Editors: Biocini, C.V.; Singh, A.D. (Cleveland, Ohio)
VIII + 100 p., 81 fig., 81 in color, 6 tab, 2012

Monographs in
Clinical Cytology

Monographs in
Human Genetics
Monographs in Oral Science

Authoritative summaries of important topics in oral science

For over three decades, Monographs in Oral Science has provided a source of in-depth discussion of selected topics in the sciences related to stomatology. Senior investigators are invited to present expanded contributions in their fields of special expertise. The topics chosen are those which have generated a long-standing interest, and on which new conceptual insights or innovative biotechnology are making considerable impact. Authors are selected on the basis of having made lasting contributions to their chosen field and their willingness to share their findings with others.

Monographs in Virology

Compact and thorough reference volumes for virologists and non-virologists alike

A skilful selection of topics of exceptional importance and a panel of acknowledged experts as authors have ensured an outstanding reputation for this series. Each monograph, centered on an active area of virologic research, provides a critical evaluation of recent progress and a useful commentary on the direction of future research. Characterized by a consistently high standard of scholarship and clear presentation of content, volumes in this series have proved their enduring value as convenient reference tools for both virologists working in the field and scientists working in allied areas.

Prices subject to change, VAT not included. EUR price for eurozone countries, USD price for USA and Latin America only.
Nestlé Nutrition Institute Workshop Series

In 2011, the two book series Nestlé Nutrition Workshop Series: Pediatric Program and Nestlé Nutrition Workshop Series: Clinical & Performance Program merged to form the Nestlé Nutrition Institute Workshop Series. One of the major components of the series is the organization of workshops and the publication of the proceedings. Each workshop focuses on the latest findings, the controversies and further research concerns various topics in nutrition. The books of this series will be of great assistance to pediatricians, clinical investigators, sports scientists as well as health workers and nutritionists concerned with both adult and pediatric health and nutrition.
Progress in Neurological Surgery

‘...(an) important series ... The editors are to be congratulated on getting together an authoritative panel of authors who can write clearly and informatively about their experience and technique.’

The Lancet

Published since 1966, this series has become universally recognized as the most significant group of books serving neurological surgeons. Volumes feature contributions from distinguished international physicians and surgeons who review the literature from the perspective of their own personal experience. The result is a series of works providing critical distillations of developments of central importance to the theory and practice of neurological surgery.

Progress in Respiratory Research

Presents and interprets new data on all aspects of the respiratory system in health and disease

Important aspects of the respiratory system, from its role in the alimentation and protection of the organism to its susceptibility to disease, receive attention in the volumes published in this series. Some volumes present debates on topics vital to respiratory research. Others represent the unique experiences of a single renowned author and stand as first-time treatments of specific issues. ‘The blue series’ is designed for researchers as well as clinicians and extends to them a collection of valuable reference tools.

Vol. 27: Gamma Knife Radiosurgery for Brain Vascular Malformations
Editors: Niranjan, A.; Kano, H.; Lunsford, L.D. (Pittsburgh, Pa.)
CHF 228.00 / EUR 213.00 / USD 268.00 (hardcover or online*)
CHF 274.00 / EUR 256.00 / USD 322.00 (online**)

Editors: Hansel, T.T.; Barnes, P.J. (London)
CHF 248.00 / EUR 232.00 / USD 292.00 (hardcover or online*)
CHF 298.00 / EUR 273.00 / USD 350.00 (online**)

*This book is a focused reference, highly recommended for any medical or pharmaceutical library
The Annals of Pharmacotherapy
Progress in Tumor Research

Overviews of key areas of tumor research

The scientific book series Progress in Tumor Research aims to provide in depth information about important developments in cancer research. The individual volumes are authored and edited by experts to provide detailed coverage of topics selected as either representing controversial issues or belonging to areas where the speed of developments necessitates the kind of assistance offered by integrative, critical reviews.

Translational Research in Biomedicine

A holistic and up-to-date approach on translational research

Translational Research in Biomedicine is a book series dedicated to the spread of seminal information in contemporary biomedicine with a translational orientation. It takes a holistic view on translational research that transcends the boundaries between bench and bedside research. Each volume, edited by experts in the field, is a synthesis of ideas, technologies and research outcomes that are associated with a particular theme in contemporary biomedicine. All volumes will be presented in a fashion that is amenable to non-experts, be they scientists or clinical practitioners.

World Review of Nutrition and Dietetics

‘... commendably high standards of scientific merit and literary clarity ...’
British Medical Journal

Volumes in this series consist of exceptionally thorough reviews on topics selected as either fundamental to improved understanding of human and animal nutrition, useful in resolving present controversies, or relevant to problems of social and preventive medicine that depend for their solution on progress in nutrition. Many of the individual articles have been judged as among the most comprehensive reviews ever published on the given topic. Since the first volume appeared in 1959, the series has earned repeated praise for the quality of its scholarship and the reputation of its authors.

World Review of Nutrition and Dietetics
Founded: 1960
Field of Interest: Nutrition, Dietetics
Listed in bibliographic services, including: PubMed/MEDLINE, Web of Science, Google Scholar
Including: PubMed/MEDLINE, Web of Science, Google Scholar

There have been no new volumes in the book series listed above. However, all back volumes are still available for purchase.
**Basic and clinical research topics across the entire medical spectrum**

Backed by a 125-year tradition of medical publishing, the Karger journal program comprises around 80 subscription journals to date, covering all disciplines of human medicine in clinical and research areas.

**Your Benefits:**
- DRM-free content
- COUNTER-compliant statistics
- KBART records for eJournals
- Free online trials available!
- Guaranteed access for five years (perpetual access available)
- Easy access via IP address or User ID and password
- Unlimited simultaneous access

### Karger eJournal Collection 2017

| Access to all online Karger journals – special arrangements for consortia |
| Customized collections according to the needs of your library |
| Mixed collections of eJournals and eBooks upon request |

*Please contact us for a customized offer!*

63 eJournals from 1998 to 2014 covering substantial progress in disciplines of human medicine in clinical and research areas over the past decades

- Purchase the complete Karger eJournal Backfile Collection at CHF 22,000 / EUR 19,600 / USD 23,600 *
- Benefit from attractive flat rates for backfiles of individual titles.
- Customize your Backfile Collection. *Please ask us for a quote!*

### Karger eJournal Archive Collection until 1997

All digitized Karger journal issues from 1997 back to each title's first year of publication. The complete collection consists of 64 titles with a total of 2,217 publication years

- Purchase the complete Karger eJournal Archive Collection at CHF 54,000 / EUR 48,000 / USD 60,000 *
- Customize your Archive Collection. *Please ask us for a quote!*

Six packages focusing on a single research or medical subject

The Karger Subject Packages – comprising eJournals and eBooks – provide highly selected content to meet the increasing demand for specific information by researchers, specialists and practitioners in hospitals, research centers, the pharmaceutical industry and other professional institutions. Each package presents a high-quality selection of peer-reviewed eJournals, established eBook series and individual eBook titles.

Karger Nephrology Package

www.karger.com/nephrology-package

Essential information on the latest progress and developments surrounding renal diseases and its treatment and related interdisciplinary topics

Karger Nephrology Package 2016/2017
5 journals 2017: CHF 6,200 / EUR 5,600 / USD 6,700
1 book series (71 titles) and 3 non-serial/individual titles 1997–2016: CHF 2,100 / EUR 2,000 / USD 2,500
Complete package: CHF 8,300 / EUR 7,600 / USD 9,200 *

Karger Nutrition Package

www.karger.com/nutrition-package

Indispensable reading on the latest progress in nutrition research, also for government institutions and the nutrition industry

Karger Nutrition Package 2016/2017
4 journals 2017: CHF 5,200 / EUR 4,700 / USD 5,600
3 book series (81 titles) and 16 non-serial/individual titles 1997–2016: CHF 3,200 / EUR 3,000 / USD 3,700
Complete package: CHF 8,400 / EUR 7,700 / USD 9,300 *

Karger Oncology Package

www.karger.com/oncology-package

In-depth coverage of a wide range of topics in cancer research and treatment

Karger Oncology Package 2016/2017
8 journals 2017: CHF 5,300 / EUR 4,800 / USD 5,800
5 book series (35 titles) and 42 non-serial/individual titles 1997–2016: CHF 4,000 / EUR 3,800 / USD 4,700
Complete package: CHF 9,300 / EUR 8,600 / USD 10,500 *

* Prices excl. VAT
EUR prices for eurozone countries, USD prices for USA and Latin America only
Karger Subject Packages

Karger Ophthalmology Package

Focused information on key topics such as corneal or macular disorders, eye surgery and pharmacological issues, also for optometry schools and the industry

Karger Ophthalmology Package 2016/2017
3 journals 2017: CHF 3,700 / EUR 3,400 / USD 4,100
2 book series (38 titles) and 7 non-serial/individual titles 1997–2016: CHF 2,800 / EUR 2,600 / USD 3,300
Complete package: CHF 6,500 / EUR 6,000 / USD 7,400 *

Karger Pediatrics Package

Comprehensive information on the latest progress and developments in neonatal, pediatric and adolescent medicine

Karger Pediatrics Package 2016/2017
6 journals 2017: CHF 5,700 / EUR 5,100 / USD 6,200
5 book series (93 titles) and 52 non-serial/individual titles 1997–2016: CHF 4,000 / EUR 3,700 / USD 4,600
Complete package: CHF 9,700 / EUR 8,800 / USD 10,800 *

Karger Psychology/Psychiatry Package

Extensive coverage of all aspects of psychopathology, psychosomatics and neuropsychobiology

Karger Psychology/Psychiatry Package 2016/2017
9 journals 2017: CHF 6,500 / EUR 5,900 / USD 7,100
6 book series (76 titles) and 15 non-serial/individual titles 1997–2016: CHF 1,700 / EUR 1,600 / USD 2,000
Complete package: CHF 8,200 / EUR 7,500 / USD 9,100 *
